

#### Cable ramp – 5 channels

- Material of the base:** [outdoor cable protector](#) made from vulcanised rubber, fully REACH compliant, odour-free, and highly flexible for long-lasting protection.
- Cover:** The UV-resistant polyethylene cover is designed to withstand exposure to weather and sunlight, offering excellent durability.
- Assembly:** Equipped with a nylon rod securely connecting the base and the yellow cover, ensuring a tight fit with no risk of separation.
- Load Capacity:** Supports axle loads of up to 9,072 kg, ensuring robust protection even in high-traffic areas.
- Application:** Ideal for event venues, where its lighter design allows for easy handling while still providing excellent cable protection.
- Handling:** The integrated handle ensures easy mobility, allowing two protectors to be carried at once for quick and effortless installation and removal.
